# Panic Button

## One Touch Alert to 9-1-1 and Key On-Site Personnel

**In an Instant, Emergency Voice Communications and Live Video between Hospitals and Police**

**Rave Panic Button App** - With Rave's Panic Button App from Mutualink, your smartphone becomes a lifeline to safety. When you activate your panic button, you immediately call 9-1-1, initiate a multimedia collaboration incident between Hospital Security and first responders and notify on-site personnel. Your identity and location will be transmitted to 9-1-1 dispatchers, and depending on the emergency type, on-site personnel will be notified.
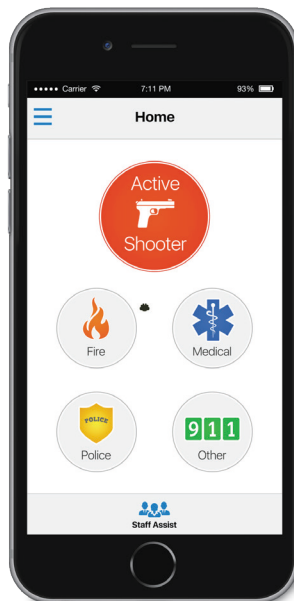

*Activated by*
**RAVE**
MOBILE SAFETY

### Benefits

- Instantly link 9-1-1, responders, and on-site personnel
- Pressing the Panic Button initiates an interoperable incident between hospital security and designated first responders
- Low cost solution for Mutualink customers to improve Hospital safety
- Emergency response personnel receive emergency communications from the source of the intrusion incident
- Dispatchers know the name and phone number of the individual initiating the call
- Peace of mind for employees

### Features

- Requires Mutualink Interoperable Workstation (IWS) or Mutualink Edge for Windows

**REDUCE TIME TO RESOLUTION BY 50%**

Pressing the Panic Button:

**1** - dials 9-1-1

**2** - initiates an incident on the Hospital's and Police Department's Interoperable Workstation (IWS)

**3** - alerts on-site personnel

# Panic Button

Mutualink offers both wired and wireless panic buttons that immediately notify police dispatchers of an incident at the Hospital, simultaneously initiating a multimedia collaboration session to share video and voice from intercom and/or radio from the scene in real time.

Once the session is initiated by the panic button, additional agencies can be brought in to the communications session to respond to and help resolve the incident by seamlessly sharing voice, video and data to create a common operating picture.

## Additional Benefits

- Create a common operating picture in real time with public safety agencies
- Quickly mobilize emergency response by initiating multimedia collaboration
- Real-time video and voice sharing increases awareness for First Responders
- Always available
- Immediately alerts police while capturing and transmitting video
- Customizable to make use of Hospital radio and video assets to trigger the communication session
- Affordable for Malls, Corporate or Hospital Campuses
- Reduce time to resolution by 50%
