

Mobile Go Kit

The Mutualink Go Kit is the most versatile field communications kit available. Carefully designed with input from Law Enforcement Agency customers, the Go Kit enables field personnel to communicate, share video and information, and reach back to command and control in the most hostile and austere power and communications environment.

Plug & Play and Easy to Use

In times of crisis, quick and simple deployment and ease of use are essential. Communications and information sharing should be simple and the Go Kit is as simple as it gets. Just open the kit, plug into any available power source, turn it on, plug in radios and begin collaborating.

Agile Multi-mode Connectivity

Connect back beyond the field in real time to Command & Control points with intelligent, agile, and always-ready connectivity options. Connect by Ethernet, any mobile broadband carrier, Wi-Fi or Satellite.

Extended Operational Field Capabilities

US Band 14 Router available.

Tactical Communications Interoperability & Beyond

Connect and bridge up to four (4) different radio in the field. Connect virtually any radio being used on scene, to include analog and digital, conventional and trunked radios. Simply connect a radio, select the auto-configuration and it's ready to go. Capable of connecting civilian and public safety radios providing key bridging between public safety, federal and civilian agencies.

Best in Class Security

Standard AES 256 military grade encryption with IP SEC tunneling. RSA 1048 bit encryption certificated authentication. Dual encrypted AES 256 tunneling configurable for highly sensitive communications. FIPS 140-2 routing device and Suite B enabled.

Rugged Multimedia Field Operations Workstation

The Go Kit is equipped with a best in class low ruggedized portable laptop with microphone. Bridge mobile and telephone assets on-demand; seamlessly connect with other field nodes and command and control points. Send and receive live video and information files for enhanced situational awareness.

Compact Go Kit

GO KIT: Mobile & Compact

Quickly deploy the Go Kit for secure on-scene real-time radio, voice, video, file and location sharing with enhanced situational awareness between agencies. A network-agnostic field-deployable solution for interoperable communications.

Multimedia Advantage

CONNECT ANYWHERE, ANYTIME WITH FLEXIBLE AND AGILE EMERGENCY COMMUNICATIONS AND INTEROPERABILITY

- ✓ Connects to LTE, satellite or hardwired internet
- ✓ Bridge up to 4 different radios
- ✓ Bridge up to 4 telephones (SIP, VoIP, PSTN)
- ✓ Send and receive real-time full motion video
- ✓ Send and receive files
- ✓ Send and receive text messages

Key Features

RUGGED AND RESILIENT

- ✓ Water Resistant Portable Case
- ✓ On-board Rechargeable Power Supply (optional)

BEST IN CLASS TACTICAL COMMS AGILITY

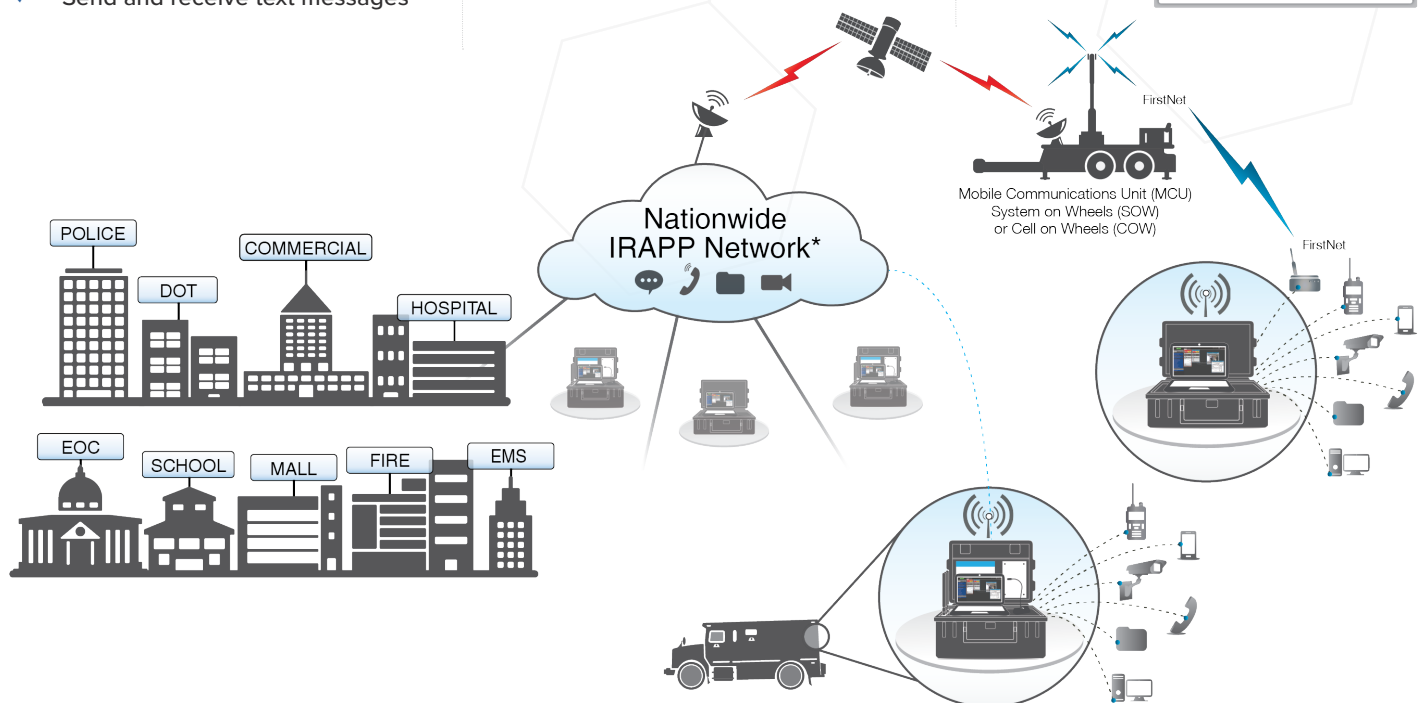

Real-time communications tactical capability evaluated, tested and used by leading agencies worldwide.

Key Architecture Benefits

BUILT BY AND FOR FIELD OPERATORS AND COMMANDERS

- ✓ Highly Secure – NIST FIPS 140-2 AES 256 Encryption, RSA Certificated Authentication
- ✓ Easy to Use – plug and play with minimal user training

- Any to any Voice
- Any to any Video
- Any to any Files
- Any to any Text

GO KIT: Mobile & Compact

Go Kit For Public Safety And Defense

Any public safety, emergency response or special forces agency or operator needing reliable, agile, on-demand interoperable communications and situational awareness in the field needs the powerful capabilities of the Go Kit. The Go Kit delivers instant field operations fusion capabilities by delivering coordinated voice, video and information sharing within organizations and with partners. If you need to communicate or share real time video and information to execute your mission, the Go Kit is for you.

- ✓ Emergency Response and Rescue
- ✓ Large Scale Event Security
- ✓ Rapid Response Teams
- ✓ Civil Support and Reconstruction Teams
- ✓ Civil Affairs Teams
- ✓ Field Surveillance Operations
- ✓ Infrastructure Security and Protection
- ✓ SWAT teams

Field Sensor & System Aware Integration

The Go Kit can even work with sensor, alarm and other in-field ISR systems to deliver true real time situational awareness and coordinated communications and sharing of critical information. The Go Kit can be integrated with any field device to create instant communications nets with partners and share surveillance video upon any trigger event. Integrate with:

- ✓ Alarm Systems
- ✓ Trip Sensors
- ✓ Gun Shot Detection Systems
- ✓ Video Motion Detection Systems
- ✓ Access Control Systems
- ✓ CBRN Detection Warning Systems
- ✓ Field Robot Systems
- ✓ Biomedical Monitoring Systems
- ✓ Broadcast Message Warning System
