

**IP-NIC M500-500 Series
Multi-IPT**

Overview

Mutualink is an IP-based multimedia communication resource sharing platform that allows public safety agencies and critical community assets to communicate in a manner that is separate and apart from the general public.

Mutualink's **IP-NIC Series** of Secure Controllers embrace the integration of most IP-based communications systems. It is designed to provide connectivity to other IP devices that don't support analog interfaces. IP-NICs can be used to connect to VOIP Call Managers, IP video cameras, other 3rd party IP based radio systems, etc.

The **IPT Gateway** is built to support up to 10 ports for SIP Connections.
