

K12 Network Interface Controller

Mutualink's K12-NIC secure controller acts as a gateway for voice, video and text communications, without the need to deploy multiple physical devices.

The device addresses the limited budgets of school systems in an all-in-one device, enabling schools to participate in Mutualink's emergency management network.

About Mutualink, Inc.

Mutualink is an IP-based multimedia communication resource sharing platform that allows public safety agencies and critical community assets to communicate in a manner that is separate and apart from the general public.

- **VOICE:** LMR radios, VoIP "push-to-talk", telephone, cellular & intercom
- **VIDEO:** live feeds from buildings, streets, cruisers and helicopters
- **TEXT MESSAGING:** an effective means to communicate informational content
- **FILE SHARING:** blue prints, floor plans, photos, procedures
- **PA AND INTERCOM SYSTEM INTERFACE:** Broadcast Emergency Messages to and from the Mutualink Platform
- **DISPATCH COLLABORATION:** off-the-air conferencing between dispatch centers
