

# BUILDING SMARTER SAFER COMMUNITIES *Together*

## AN INTRODUCTION TO MUTUALINK'S TRUE INTEROPERABILITY®

Mutualink is the leading provider of a best-in-class multimedia interoperability platform LNK360™. LNK360™ enables public safety agencies and enterprise security to share voice, video, and data for improved cross-agency communications. We provide secure, scalable solutions that public safety and school officials can rely on during emergencies.

**During an emergency, timely resolution saves lives.** Our mission is to reduce time to incident resolution with the goal of saving lives. In repeated drills and exercises, Mutualink technology is proven to reduce the time-to-incident resolution by as much as **50%**.

## MOBILE EMERGENCY SCHOOL SAFETY ALERT SYSTEM

Our True Interoperability® technology connects schools and first responders for seamless multimedia communications to prevent and mitigate school violence. Our software lets schools share radio and video with law enforcement instantly with the push of a button. It connects others in the district and with first responders in the broader Mutualink public safety ecosystem.

*"We wanted this technology to save lives. The second reason we deployed it here, we wanted to put that ability to declare an emergency in everybody's hands, but third, and more importantly, we want to have quick resolution to the problem."*

**CAPTAIN RICK FRANCIS**  
Seminole County Sheriffs Office
