

Compact Go Kit

Interoperable Multimedia Solution for Seamless On-The-Go Comms

Mutualink's Compact Go Kit is the most versatile field communications resource available. Carefully engineered by and for Law Enforcement Officers, the Compact Go Kit enables seamless communication and information sharing between field agents and command centers.

Intelligent & Intuitive

In times of crisis, quick and simple deployment and ease of use are essential. The Compact Go Kit offers advanced, intelligent technology in an intuitive, easy to use device. Simply open the kit, plug into a power source, turn it on, connect your radios and begin collaborating.

Agile & Adaptable

Connect with Command & Control points from the field, in real time with our agile and intelligent device via any mobile broadband carrier, Wi-Fi, Ethernet, or Satellite.

Extendable Operation

US Band 14 Router available for Extended Operational Field Capabilities.

Interoperable & More

Connect and bridge up to four (4) radios on the scene. Compatible with virtually any radio, include analog and digital, conventional and trunked radios. Just connect a radio, select the auto-configuration and it's ready to go. Capable of connecting civilian and public safety radios to bridge communication between public safety, federal and civilian agencies.

Best-In-Class Security

We adhere to the highest standards in security, ensuring a secure channel of communication with AES 256 military grade encryption, IP SEC tunneling, RSA 1048 bit encryption, and FIPS 140-2 routing device and Suite B.

Rugged Multimedia Operations Workstation

The Compact Go Kit is equipped with a best-in-class, low ruggedized, portable laptop with speaker/microphone. Bridge mobile and telephone assets on-demand; connect seamlessly with other field nodes and command and control points. Send and receive live video and information files for enhanced situational awareness.

Compact Go Kit

Compact, Portable, and Secure Communications On-The-Go

Public Safety & Defense

Any public safety, emergency response or special forces agency or operator knows the value of reliable, agile, on-demand communications and situational awareness in the field. The Compact Go Kit is the perfect communication tool for:

Emergency Response and Rescue | SWAT teams
Large Scale Event Security | Rapid Response Teams
Civil Affairs Teams | Field Surveillance Operations
Civil Support and Reconstruction Teams
Infrastructure Security and Protection

Field Sensor & System Aware Integration

The Go Kit can even work with sensor, alarm and other in-field ISR systems to deliver true real time situational awareness and coordinated communications and sharing of critical information. The Go Kit can be integrated with any field device to create instant communications nets with partners and share surveillance video upon any trigger event. Integrate with:

Alarm Systems, Trip Sensors, Gun Shot Detection Systems, Video Motion Detection Systems, Access Control Systems, CBRN Detection Warning Systems, Field Robot Systems, Biomedical Monitoring Systems, Broadcast Message Warning System

Key Features & Architectural Benefits

- Water Resistant, Portable Case
- On-board Rechargeable Power Supply (optional)
- Best-In-Class Tactical Communications Agility
- Evaluated, tested, and implemented by leading agencies worldwide
