mutualink™

CASINO SAFETY, SECURITY & OPERATIONS MANAGEMENT

Built to bring Incident Command System (ICS) best practices to high-traffic, multi-building properties, Mutualink's LNK360 platform instantly connects Casino Security teams to area law enforcement agencies when an incident occurs. This instant sharing of voice communications, live streaming video and vital data speeds response time and enhances situational awareness, which helps responders saves lives and protects property. LNK360 is also a scalable solution for managing daily operations and running seamless large-scale events.

MULTIMEDIA ADVANTAGE

Fast And Easy Connections
The Mutualink LNK360 platform allows seamless real-time video, radio, telephone, file and text collaboration between your security team, community partners, and first responders.

Communications and media remain independent to the facility until a panic button or sensor is triggered, granting temporary, invitation-only access to first responders in an average of 15-20 seconds, or less. Mutualink's patented applications meet or exceed most statutory or regulatory gaming requirements.

When first responders are notified immediately, and can to arrive on a scene with clear voice and video information, they gain the necessary situational awareness to quickly resolve the incident.

Scalable
Casinos are high-traffic, complex, multi-room/building operations. This makes the management of daily operations and emergency resolution crucial – and difficult. LNK360 is a scalable solution that leverages multimedia interoperability on any device or network. LNK360 is a scalable solution that uses multimedia interoperability and dynamic sharing to seamlessly improve Casino management, security and safety.

Customizable Incidents
Create customizable incidents with LNK360 for your specific communications needs - connect with other buildings in your system, manage special events, concerts and operations and be prepared for a crisis.

KEY FEATURES AND BENEFITS

One System Compatible with All of Your Devices
In an emergency, Casinos must be able to communicate with first responders. Mutualink LNK360 is a device agnostic platform, offering the ability to bridge disparate radio systems. Mutualink makes the most of your prior security investments by combining them into one unified system for operations, security, and defense in an emergency.

Proven & Secure Interoperability Technology
The Mutualink LNK360 platform incorporates proven interoperability technology, SAFETY Act certified by the United States Department of Homeland Security.

BEYOND EMERGENCY RESPONSE

A Powerful, Secure Platform for Daily Operations
Coordinate daily operations quickly and easily with LNK360's talk group that enables secure, unified communications across buildings and facilities. Every member of the talk group can share audio and video.
