

# #1 Trusted Interoperability Provider

Mutualink solves your most complex communication challenges. Proven technology and services, to connect your teams across the globe with federal, state, local and tribal partners for more than 17 years.

## Tactical Go Kit

This compact system enables on-scene interoperability between multiple agencies with the following capabilities:

- Up to 4 radio systems for PTT radio interoperability
- Up to 2 video feeds for situational awareness
- A controlling laptop with full PTT voice and video communications capability
- An LTE router for connection to the Internet and remote communication systems
- Ruggedized case for mobile and field use
- Multiple Go Kits may be chained together to achieve additional capacity as needed

## Interoperability as a Service (IaaS)

Mutualink offers operation support, maintenance services and system engineering support, to operate a secure interoperability network outside your enterprise network.

- Provides PTT voice, video, chat, file sharing, location sharing, and situational awareness between all users
- Applications available for Android, iOS, Windows, MacOS, and browsers
- Connect to agencies' local radio/audio/video systems via a family of gateways
- Expand interoperability globally by connecting to Go Kits and Tactical PTT servers

## Enterprise On Premise Solutions

These systems offer similar capabilities to the LNK360 IaaS offering, but are deployed on the agencies' local premises. These systems can also connect to the hosted IaaS systems on-demand for expanded interoperability as desired.

Applications available for Android, iOS, Windows, MacOS, and browsers
