Saving Minutes When Every Second Counts™

Hospital Safety, Security & Operations Management

Mutualink's LNK360 platform is an intelligent, scalable solution that streamlines internal communication and operations for Hospitals. When faced with an active threat or emergency, Hospitals can also use LNK360 to instantly share pertinent information and multimedia communications with local police and other first responders, powering a better, faster, more coordinated resolution.

STREAMLINED COMMUNICATIONS & COHESIVE INTERNAL OPERATION

Unified Alerting System for Coordinated Care
- Integrate hardwired, wireless and mobile panic buttons, pagers, alarms, access control systems, sensors and more to monitor high-risk patients, quickly aid falls and tend to other sensitive patient needs in a timely, coordinated manner

Customized TalkGroups for Every Operation
- Create a variety of customized TalkGroups to divide and streamline communications by shift, floor, building and even across Hospital sites
- Pre-build TalkGroups for routine shifts and launch impromptu TalkGroups for on-the-fly problem-solving and coordination as needed
- Easily conference remote and in-person staff

Small On-Site Security Teams with Big Impact
- Arm your internal security team with the resources they need to provide high-impact, comprehensive oversight
- Monitor volatile, high-risk and sensitive patients, and handle issues that arise internally, while maintaining the ability to involve police quickly when needed or desired

SEAMLESS THREAT DETECTION & EMERGENCY COORDINATION

Seamless Hospital/Ambulance Diversion
- Initiate instant, simultaneous communications to any/all local hospitals & EMS teams for diversion
- Save time, lives and confusion by ensuring patients requiring critical care are routed directly to a hospital that is not at capacity, when yours is

Identify, Monitor and Respond to Active Threats
- Mutualink LNK360 is a device-agnostic platform, compatible with all radios, videos, alerts and panic buttons, bridging disparate radio systems
- Make the most of your hospital's prior security investments by merging them into one unified system of defense that can be shared with police

Easily & Instantly Pull in Police When Needed
- Most hospitals can't communicate with area law enforcement on their private radio system, LNK360 bridges disparate radio systems to enable instant voice communications and file and data sharing with first responders for consults
- LNK360's proven interoperability technology is the first of its kind to be SAFETY Act certified by the U.S. Department of Homeland Security

mutualink™

Powering Seamless Internal Operations and Rapid Emergency Response

Sharable Multimedia Communications

✓ Save time by getting all pertinent information to first responders before they even arrive on scene

✓ Real-time all-hazards communications

✓ Broadcast radio, voice, video, text and data to a group

✓ Trusted interoperability provider: SAFETY Act Certified

✓ Intuitive graphical user interface

✓ Full multimedia collaboration: text, streaming video with cameras plotted on smart floor plans, data, location awareness. And voice, too

✓ Send and receive video and files using your device camera, individual cameras or management system

mutualink ecosystem

- Video
- Drone Integration
- Intelligent Data
- Mapping
- Video enhancement (rain, smoke, fog, dusk)
- 911
- PPT Radio
- Physical/mobile panic buttons
- Chemical/biological sensors
- Incident command database software
- AI
- Access Control
- Floor Plans
- Real-time Voice
- Common Alerting Protocol (CAP)-based alerting
- Gunshot Detection
